## Zap Roller\* SPECIFICATION

### Product Specification :

DESCRIPTION	SPECIFICATION
Components	Comprises of 1. Steel roller 2. Steel frame 3. Rust-free chain 4. Conductive rubber
Material	High grade rust-free stainless steel and rubber 1. Steel roller - High grade (304) rust-free stainless steel 2. Steel frame - High grade high tensile stainless steel wire 3. Metal chain - High grade chromed rust-free chain (Length : 1 feet / 30cm) 4. Conductive rubber - seamless continual piece with no joint.
Benefits	1. Zap roller totally eliminate the need for periodical change ( saving labour to fix & dismantle) of ESD castors due to wear & tear. 2. <b>Soft surface for better electrical contact</b> 3. Typical surface-to-ground electrical resistance: 10e5 to 10e6 ohms. 4. "Rolling" design eliminate abrasive dragging action and maintain conductivity to ground during movement. 5. Robust design ensures very long and durable working life, saving maintenance & replacement cost. 6. A practical & permanent ESD-free grounding solution.
Application	Can be use for grounding of chairs, storage shelves, carts, table, etc

This physical properties show the typical values obtained by averaging a number of test results and small divergencies from the quoted figures may occur. This is only a laboratory test, it does not serve for guarantee purpose.
